- Refine the edits using the Roll Tool

Motion and Speed

- Keyframe Animation
- Long Reef Beach Animation Exercise
- Speed Change

Save and Export

- Save and Share
- Adobe Media Encoder

“This course was awesome. I had used the software briefly before the course, so it was useful in filling in a lot of the gaps that I had.”

Josie Pires

“I learnt all the different uses of Premiere Pro, from photo to video content and the ways you can edit audio. The tutor was extremely helpful and encouraged as much creativity as possible!”

Samuel Bauermeister

Delivery Style

Face-to-face classes

These classes run in a classroom and you will need to bring your own device with Adobe Premiere Pro installed. You should ensure it is fully charged as access to power is limited.

Online classes

You will need your own device with Adobe Premiere Pro installed. We also recommend using a computer with a larger screen, or two screens/devices. A small laptop screen provides limited space, and it can be difficult to manage following the facilitator's screen and using your own software.

Materials

Course materials are provided electronically, including a booklet and exercise files.

Before the course

You will need an Adobe Creative Cloud account to participate. If you don't have an existing account, you [can purchase an Adobe Creative Cloud account here](#). Please bring your account login details with you to class.

Recommended operating system: Windows or Mac

Recommended software: latest version of Adobe Premiere Pro

Download the **BETA** version through your Creative Cloud to access the AI features.

Organisational training and development

This course can be delivered as a private session for groups, and tailored to meet the needs of your business. Contact us to discuss our range of organisational training solutions.
